

Reading in DB Shapefile

Jonah Edmundson

08 May, 2023 15:39:35

Downloaded from [here](#).

```
library(terra)
## terra 1.7.18
window = vect("../data/DB_shapefile/ldb_000b21a_e.shp")
plot(window)
```

#Methods that didnt work:

```
#library(sf)
#canadaDBs = read_sf(dsn = "../data/DB_shapefile")
#load('./canadaDBs.Rdata')
# library(spatstat)
# library(maptools)
# window = as.owin(canadaDBs)
#####
# library(fastshp)
```

```
# library(ggplot2)
# shp = read.shp("../data/DB_shapefile/ldb_000b21a_e.shp", format="polygon")
# shp.list <- sapply(shp, FUN = function(x) do.call(cbind, x[c("id", "x", "y")]))
# shp.df <- as.data.frame(do.call(rbind, shp.list))
# rm(shp, shp.list)
# shp.gg <- ggplot(shp.df, aes(x = x, y=y, group = id))+geom_polygon()
# shp.gg
```
